

FARM FRIDAY FUN

WITH ARIZONA AGRICULTURE

ARIZONA APPLES

Apple trees take 4-5 years to produce their first fruit.

There are 2,500 varieties of apples in North America.

25% of an apple is air, which is why it floats.

Apples ripen 6-10 times faster at room temperature than apples that are refrigerated.

It takes 36 apples to make 1 gallon of apple cider.

The apple is the State Fruit of 6 states.

Arizona dates are harvested late August to September and are harvested by hand.

The Arctic Apple is a genetically engineered apple that does not brown when it comes into contact with oxygen. Science is such a cool thing!
