BEE FACTS

There are 3 bees in a hive: The **QUEEN**, **DRONES**, and **WORKERS**

The Queen Bee is a female bee. There can only be one queen in a hive.

The Drones are male bees. The Worker bees are female bees.

The average bee will make 1/12 a teaspoon of honey in its life.

Bees communicate or talk through dancing.

A Queen bee can lay up to 2,000 eggs a day.

A worker bee only lives 6-8 weeks.

A hexagon is used in a honeycomb because it holds the most amount of honey with the smallest amount of wax.

A hive can collect 66 pounds of pollen a year.

For every pound of honey made a hive must collect 10 pounds of pollen.
